Measurement date	

Patient's name		Date of injury	
Breed of dog		Diagnosis	
Age (years)		Grading of lameness	
Weight (kg)		Limb	

Knee orthosis

Name	Symbol	Measure	Value (cm)
Circumference measured above the ankle joint	A	Circumference	
Circumference measured at the height of the tibial tuberosity	B	Circumference	
Circumference measured through the center of the knee joint	C	Circumference	
Circumference measured at the height of the kneecap	D	Circumference	
Circumference at the level of the skin fold	E	Circumference	
Height measured from the kneecap to the ground	F	Length	
Height measured from the tibial tuberosity to the ground	G	Length	
From the ground to the height of the skin fold	M	Length	
Length from the tibial tuberosity to the measurement of the circumference above the ankle joint (A)	H	Length	
Length from the patella to the tibial tuberosity	I	Length	
Length from kneecap to thigh circumference (E)	J	Length	
Length from the measurement above the hock to the knee joint (back of the paw)	K	Length	
Length from thigh girth to knee joint (back of paw)	L	Length	
Width at the ankle joint at the height of the distal Achilles tendon attachment	A'	Length	
Width measured through the center of the knee joint	C'	Length	
Width at skinfold height	E'	Length
