Measurement date	

Patient's name		Date of injury	
Breed of dog		Diagnosis	
Age (years)		Grading of lameness	
Weight (kg)		Limb	

Tarsus orthosis

Name	Symbol	Measure	Specification	Value (cm)
At the level of the lower attachment of the Achilles tendon	A	Circumference	Mesurement required	
Metatarsal	B	Circumference	Mesurement required	
Tibial tuberosity to the ground	C	Length	Mesurement required	
From heel bump to the ground	D	Length	Mesurement required	
Pathologic angle in the ankle joint. Landmark medial/lateral ankle.	S1	Angle [°]	Goniometric measurement (0-360°)	
Foot length	E1	Length	Mesurement required	
Foot width	E2	Length	Mesurement required	
From the S1 point to the middle of the metatarsal	F	Length	Mesurement required	
From the point of the medial/lateral ankle to a point above A	G	Length	Mesurement required
